

TKM XTRACK & EDGE

TKM XTRACK & TKM EDGE

The latest 2007 Homologated TKM XTRACK & TKM EDGE models share many elements - but with a few key differences. Either way both have a wealth of advantages. Both models are fully upgraded latest designs of the multi-winning TKM Storm & TKM Blade chassis with 32mm tubing throughout. These exciting new models offer the exact degree of compromise of handling needed for cold wet club meetings through to national championship levels. The TKM XTRACK is generally recommended for the smaller, younger Junior and together with the Senior Extreme lighter drivers and has the pedals situated 20mm closer to rear axle whereas the TKM EDGE with slightly stiffer & wider front end is ideal for the bigger Junior as well as the Senior Extreme driver. In addition they have been greatly refined and revised in detail giving these new breed of chassis clear advantages over the opposition in terms of build quality and equipment together with race pace.

Technical Specification

Wheelbase - 1045mm

Chassis - High spec CDS tubes, craftsman welded in unique jigs for superb accuracy. Special sleeved areas to increase chassis life. High gloss powder coat finish.

Stub Axles - Multipoint front ride-height adjustment with precision machined king-pin bolts with reamed stub axle yokes for strength and accuracy.
